Introduction

The cryptocurrency revolution changed finance, but most blockchains remain vulnerable to quantum computing. QuantumCoin[™] is designed from the ground up to resist quantum threats and restore individual sovereignty. It is not a speculative project; it is a movement to secure digital ownership for generations. Vision & Philosophy

QuantumCoinTM exists to provide a fair, secure, and sovereign money for humanity. Inspired by the failures of centralized finance and the vulnerabilities of first-generation crypto, QQQTM follows three principles: scarcity, security, and sovereignty. The Latin motto, Moneta Vera Proprietate, embodies its mission: The True Coin of OwnershipTM.QuantumCoinTM exists to provide a fair, secure, and sovereign money for humanity. RevStop™

RevStopTM is an unprecedented user-sovereignty system. It allows holders to cryptographically lock their wallets with a USB key or cryptic password. Unlike centralized freezes, RevStopTM is decentralized and enforced by protocol rules. Economics & Distribution (Fair Launch)

QuantumCoin™ (QQQ™) follows a strict fair-launch distribution model. There is no pre-mine, no developer reserve, and no insider allocation. Every unit of QQQ™ must be mined through Proof-of-Work. The total supply is capped at 22,000,000 QQQ™, distributed over ~66 years. Halving occurs every 2 years for the first 50 years, then every 4 years thereafter. This guarantees scarcity, fairness, and decentralization.QuantumCoin™ (QQQ™) follows a strict fair-launch distribution model. There is no pre-mine, no developer reserve, and no insider allocation. Mining

Mining is the sole method of coin creation. Rewards begin high and halve every 2 years, ensuring fairness while incentivizing early adoption. The mining process is deliberately designed to stretch issuance over decades, preventing early monopolization. Mining is the sole method of coin creation. Introduction

The cryptocurrency revolution changed finance, but most blockchains remain vulnerable to quantum computing. QuantumCoin[™] is designed from the ground up to resist quantum threats and restore individual sovereignty. It is not a speculative project; it is a movement to secure digital ownership for generations. Vision & Philosophy

QuantumCoinTM exists to provide a fair, secure, and sovereign money for humanity. Inspired by the failures of centralized finance and the vulnerabilities of first-generation crypto, QQQTM follows three principles: scarcity, security, and sovereignty. The Latin motto, Moneta Vera Proprietate, embodies its mission: The True Coin of OwnershipTM.QuantumCoinTM exists to provide a fair, secure, and sovereign money for humanity. Technical Architecture

QuantumCoinTM is implemented in Rust for safety and performance. Its cryptographic foundation is Dilithium2, ensuring resilience against Shor's algorithm and quantum adversaries. zk-STARKs compress blockchain data and enable shielded transactions. Proof-of-Work consensus ensures fairness, while RevStopTM empowers users to secure their funds at the wallet level.QuantumCoinTM is implemented in Rust for safety and performance. RevStop™

RevStopTM is an unprecedented user-sovereignty system. It allows holders to cryptographically lock their wallets with a USB key or cryptic password. Unlike centralized freezes, RevStopTM is decentralized and enforced by protocol rules. This guarantees that even under key compromise, funds remain protected.RevStopTM is an unprecedented user-sovereignty system. Economics & Distribution (Fair Launch)

QuantumCoin™ (QQQ™) follows a strict fair-launch distribution model. There is no pre-mine, no developer reserve, and no insider allocation. Every unit of QQQ™ must be mined through Proof-of-Work. The total supply is capped at 22,000,000 QQQ™, distributed over ~66 years. Halving occurs every 2 years for the first 50 years, then every 4 years thereafter. This guarantees scarcity, fairness, and decentralization.QuantumCoin™ (QQQ™) follows a strict fair-launch distribution model. There is no pre-mine, no developer reserve, and no insider allocation.
